**Hiring Manager**

Innovaccer

Noida, India

Dear Hiring Manager,

I am writing to express my strong interest in the Associate Software Engineer position Hiring Program for 2025. As a final-year B.tech student specializing in Computer Science and Engineering with a focus on Artificial Intelligence at the Institute of Engineering and Technology, Lucknow, I am eager to leverage my technical skills, hands-on project experience, and leadership abilities to contribute to your esteemed organization.

My academic journey, coupled with practical internships, has equipped me with a solid foundation in software development, data analysis, and competitive programming. During my Software Development Internship at HashedBit Innovation, I engineered responsive web applications using HTML, CSS, JavaScript, and React.js, which significantly improved user engagement. Furthermore, I streamlined back-end processes using Node.js and MySQL, achieving a 15% reduction in server response times. These experiences have honed my problem-solving skills and deepened my understanding of full-stack development.

In addition to my technical expertise, I have demonstrated leadership as the Branch Head of Parmarth: The Social Club at IET Lucknow, where I successfully led a team of over 200 students. This role allowed me to refine my communication, teamwork, and organizational skills, all of which are critical in dynamic, high-pressure environments.

My coding achievements, such as securing top global ranks in various competitive programming platforms like Leetcode, Codeforces, and Codechef, reflect my dedication to continuous learning and excellence in problem-solving. These experiences have further solidified my ability to approach challenges analytically and creatively. I am particularly drawn to this opportunity because it aligns with my passion for leveraging technology to drive innovation and efficiency. I am excited about the prospect of contributing to your team and am confident that my background, skills, and enthusiasm make me a strong candidate for the Associate Software Engineer .

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to your team. Please find my resume attached for further details about my qualifications and experiences.

Sincerely,

Ashish Maurya,
